

10 Year Warranty for Diamon-Fusion® Protective Coating on Granite, Ceramic, Porcelain and Quartz Surfaces

Diamon-Fusion treated granite, ceramic, porcelain and quartz surfaces are guaranteed to remain more water repellent than the untreated surface for the lifetime as long as manufacturer care recommendations are followed and no abrasive cleaners are used. Diamon-Fusion chemically bonds to granite, ceramic, porcelain, and quartz surfaces creating a patented, protective coating that when properly applied by an authorized applicator, is guaranteed not to haze, chip, crack, peel, or discolor. No Revitalizer™ is required to maintain the warranty.

In the event of a covered product failure, DFI's liability is limited to the cost of replacing DFI chemical materials for retreatment, and will in no way extend to indirect, incidental or consequential damages incurred in relationship to this product.
