

The FuseCube™ Edge is designed to be efficient and convenient, integrating the speed and multi-cycle cartridge system of the popular FuseCube™ Express. Featuring a bold, new configuration, glass fabricators can apply Diamon-Fusion® protective coating onto both sides of oversized lites on the long edge. This design approach ensures easy handling, fast loading, and streamlined production flows. With the FuseCube™ Edge in your corner, you can add more value to your glass and increase profit margins. Automate today and gain an edge on your glass products.

EDGE-TO-EDGE PROTECTION

Advanced Coating Technology	Proprietary chemical vapor deposition process
Efficiency	Treats 1-5 lites in approximately 15 minutes
Cartridges	One cartridge set = five cycles (or 25 lites)
Rack Design	Load and treat glass on the long (horizontal) edge
Footprint¹	11' x 5' (3,35M x 1,52M) + Door Clearance
Double-Sided Coverage	Consistently treats both sides of the glass
Max Glass Size	120" x 60" (3,04M x 1,52M)
Harp Rack²	Two (2) racks included
Accessibility Options	Includes two (2) treatment chamber doors for better accessibility
Two (2) Year Warranty	Routine service visits come standard
Touch Screen Monitor	Simple operation and user-friendly
Real-Time Monitoring	Receive program updates and performance metrics
Compressed Air	20 PSI
Water Pressure	30 PSA via 1/4" tubing
Installed Power	50-60Hz 9.6Kw 208-230 VAC/3-Phase
Connectivity	Broadband Internet via CAT5
Exhaust	18-inch stack at far-right rear of structure (9 feet included)

1 Chamber sizes can be customized to accommodate your specifications.
 2 FuseCube™ Express harp racks available for standard size door lites.
